

Our Alloy system provides an economical sign solution for customers who want a modern, industrial style that will last the test of time. The fabricating method we use is environmentally friendly. The system offers many end-user updatable sign types.

The Alloy system has a maximum size of 24" x 48". Available sign types are:

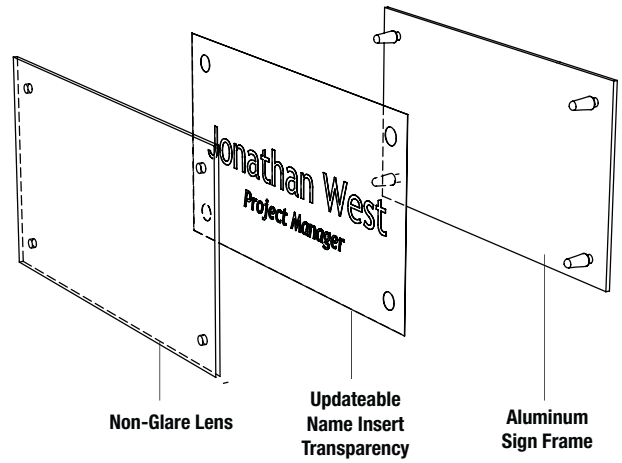

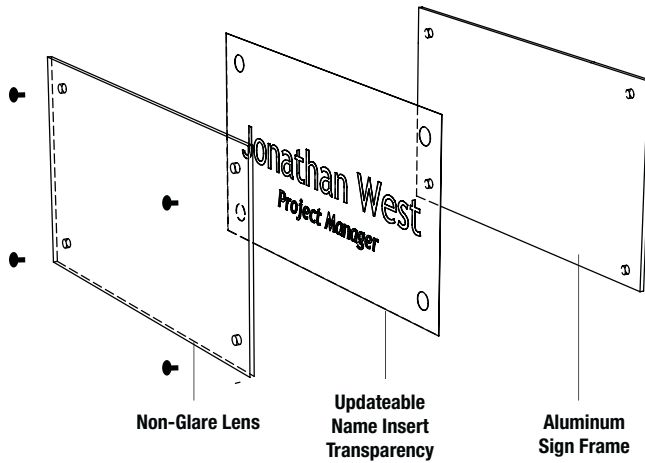

- ADA & Code-Compliant Room Signs
- Wall-Mount Directionals & Directories
- Flag-Mounts
- Suspended Double-Sided
- Cubicle & Workspace Options

The end-user has the ability to make simple changes and updates to room/cubicle signs with the use of transparencies and any desktop printer. The end-user updatable Alloy signs use either our Snap-In-Place lens fixture (patent pending) or our Bolt-In-Place lens fixture. Changes to tactile only signs are made by replacing the sign.

The Alloy signs manufactured by Century Sign Builders are warranted for the life of the building. Should any Century Sign Builders' Alloy signs fail to perform to your expectations, we will replace them free of charge. It's that simple.

How It Works - Components

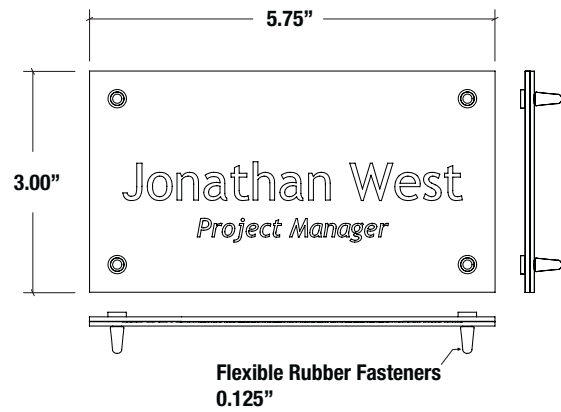

End-user updateable signage with Snap-in-place lens fixture (patent pending) or Bolt-in-place lens fixture.

Available with Allen Bolt

Elegant Ultra-Thin Profile

ADA/Code Signage

A complete ADA & Building Code-Compliant solution.

Prices include all components. Design, installation/shipping fees are not included.

These signs are designed to comply with:
