

DIVERSITY Updateable Sign System

DIVERSITY
INTERIOR

Century Sign Builders has been designing, manufacturing, and installing signs for over 30 years. We know that many of our customers need a **versatile** sign system – one that can be updated easily, timely and economically. Our **Diversity** sign system is the ideal sign solution for customers who want flexibility and style at an affordable price.

The Diversity sign system allows for a unified look that works well in any environment and includes all the necessary sign types:

- ADA & Code-Compliant Room Signs
- Wall-Mount Directionals & Directories
- Flag-Mounts
- Suspended Double-Sided
- Free-Standing Pylons
- Cubicle & Workspace Options

Diversity is a **sustainable** sign system that significantly reduces your cost of updates. The end-user is able to make simple changes and updates to room/cubicle signs with the use of transparencies and any desktop printer. Changes to larger signs are made through the use of digitally printed waterfast media.

Using the Diversity sign system allows the following changes to be made:

- An occupant's name or title
- The name or function of a room
- Directory or directional information
- Backgrounds to accommodate interior design or logo updates

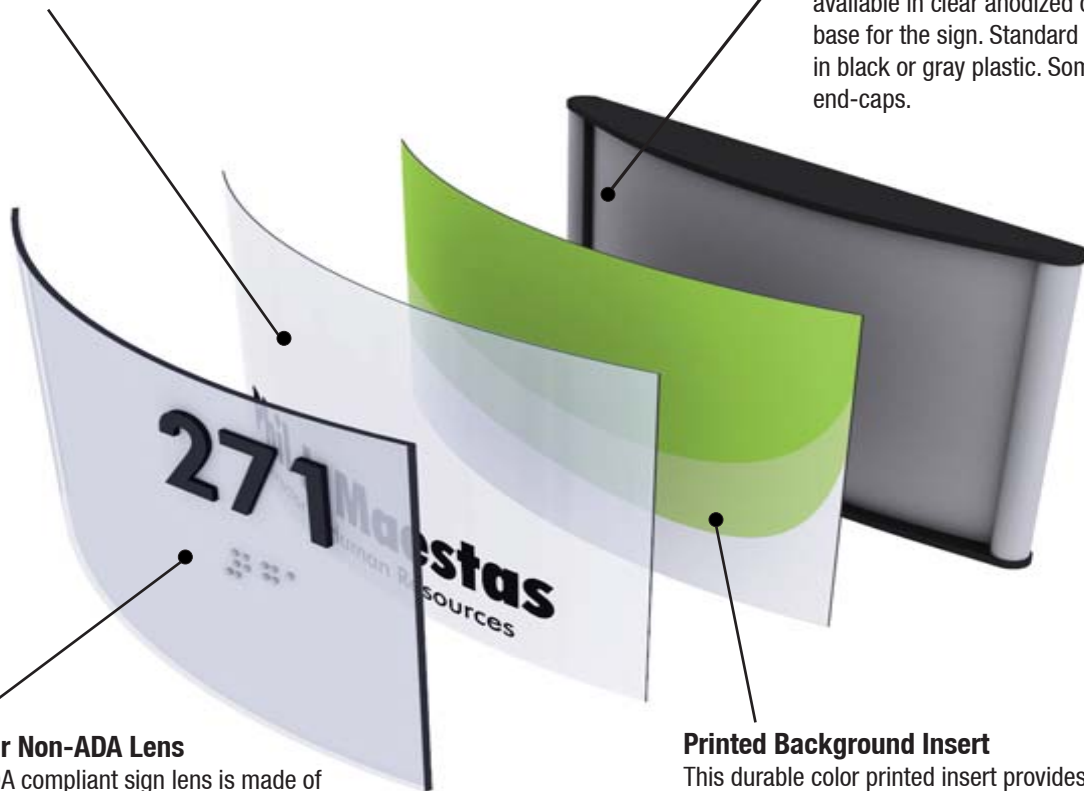

How It Works-Components

Transparency

The end-user updateable transparency insert is created on an ink jet or laser printer using an MS Word template.

Curved Frame & End-Caps

A sturdy and stylish curved aluminum frame, available in clear anodized or black, provides the base for the sign. Standard end-caps are available in black or gray plastic. Some sizes require metal end-caps.

ADA or Non-ADA Lens

The ADA compliant sign lens is made of 1/16" matte-clear substrate with 1/32" raised characters and corresponding domed Grade II Braille.

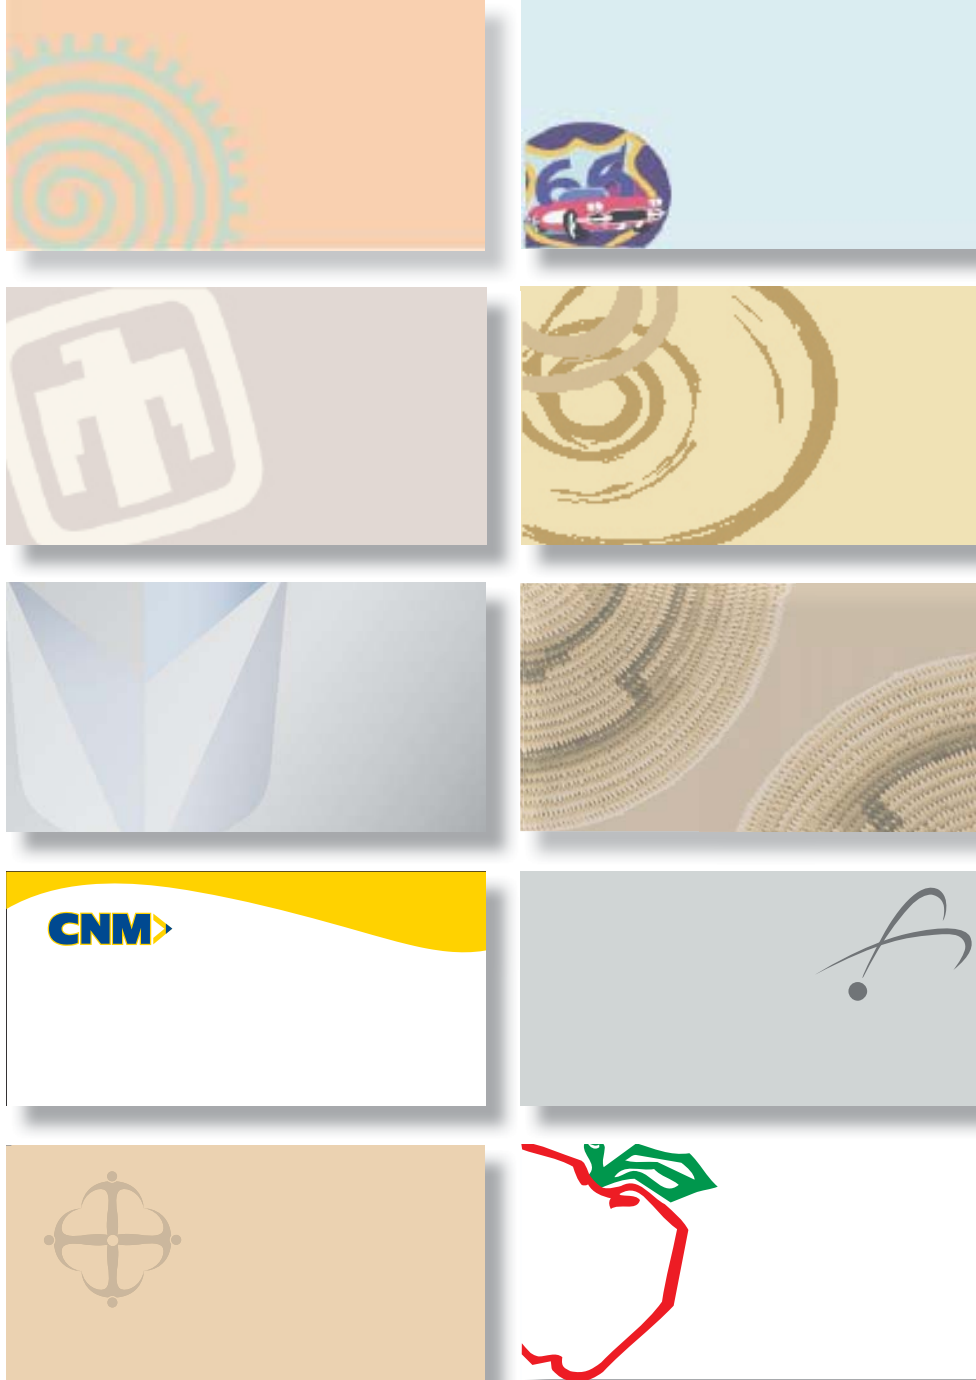

Printed Background Insert

This durable color printed insert provides the visual background for the sign. This insert remains in place when the transparency layer is updated. The material is a satin coated, tear-resistant, rigid PVC media with a waterfast coating. The backgrounds are characterized by high color brilliance, high image definition and long durability.

Please visit our website at www.csbsigns.com for the construction specifications for this product.

Printed Background Insert

- Printed Background Insert:**
- The material is a satin-coated, tear-resistant, rigid PVC media with a waterfast coating
 - Durable and changeable
 - Provides a visual background
 - Unlimited design potential
 - Must provide enough contrast to allow the black text on the transparency layer to be read

✓ Ask your Project Manager to assess a design budget for your project's background insert.

ADA/Code Signage

A complete ADA & Building Code-Compliant solution.

Prices include all components. Design, installation/shipping fees are not included.

These signs are designed to comply with:

- Americans with Disabilities Act (ADA)
- Americans with Disabilities Act Guidelines (ADAAG)
- American National Standards Institute (ANSI)
- International Building Code (IBC)

It's The Law

 IF YOU HAVE A MEDICAL EMERGENCY OR ARE IN LABOR,
 YOU HAVE THE RIGHT TO RECEIVE,
 within the capabilities of this hospital's staff and facilities:
 • An appropriate medical SCREENING EXAMINATION
 • Necessary STABILIZING TREATMENT
 (including treatment for an unborn child)
 and, if necessary,
 • An appropriate TRANSFER to another facility
 even if YOU CAN NOT PAY or
 DO NOT HAVE MEDICAL INSURANCE

 or
 YOU ARE NOT ENTITLED TO MEDICARE OR MEDICAID
 THIS HOSPITAL DOES PARTICIPATE
 IN THE MEDICAID PROGRAM

Sign Updates

End user updateable sign system solution.

Prices include all components. Design, installation/shipping fees are not included.

DT-KIT

Diversity Delux Sign Kit contains the following:

- Box of 100 Transparencies
- Suction Cup Key to remove the lens
- Rotary Trimmer
- CD containing templates
- Instructions

Guidelines for Updating Wall Mounted Room Signs, Cubical Signs and Free Standing Desk Signs.

- Using the supplied template, print an updated transparency and trim to the proper size.
- To remove the lens from the frame, use the suction cup to pull on the center of the lens.
- With the lens removed, replace the old transparency with the newly created one.
- Replace the lens carefully, insuring that the background and transparency are not damaged.
- Apply a mild glass cleaner to a soft, lint-free rag to remove any fingerprints.
- Do not spray directly on the sign.
- Do not use industrial strength cleaners.
