

# BASIC Affordable Sign System

BASIC  
INTERIOR

Our Basic system provides an economical sign solution for customers who want a traditional style that will last the test of time. Available in 30 background and raised text/symbol colors, the Basic system goes well with any decor. Because the color is imbedded into the single-ply modified acrylic used in Basic – there is no risk of chipping or peeling paint. The fabricating method we use is environmentally friendly. The system offers borders, rounded corners and many end-user updatable sign types.

The Basic system has a maximum size of 24" x 48". Available sign types are:

- ADA & Code-Compliant Room Signs
- Wall-Mount Directionals & Directories
- Flag-Mounts
- Suspended Double-Sided
- Cubicle & Workspace Options

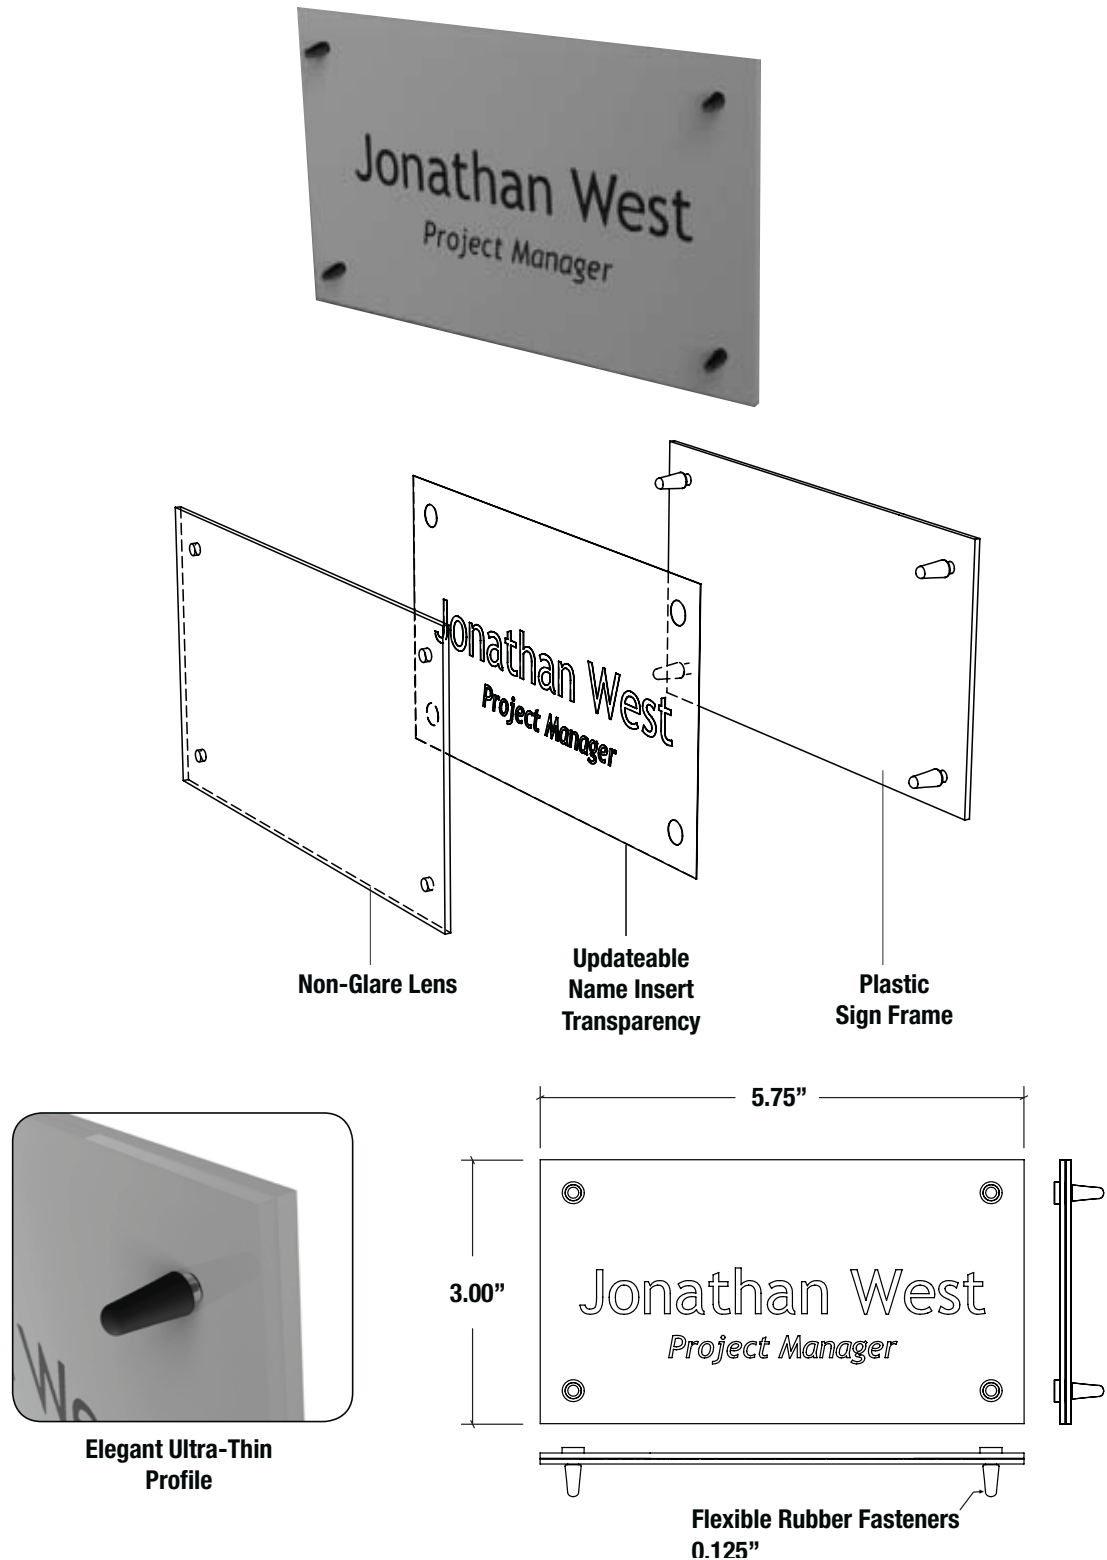

The end-user has the ability to make simple changes and updates to room/cubicle signs with the use of transparencies and any desktop printer. The end-user updatable Basic signs use either our Snap-In-Place lens fixture (patent pending) or our Bolt-In-Place lens fixture. Changes to tactile only signs are made by replacing the sign.

The Basic signs manufactured by Century Sign Builders are warranted for the life of the building. Should any Century Sign Builders' Basic signs fail to perform to your expectations, we will replace them free of charge. It's that simple.

## How It Works - Components

### B3x6-NP

End-user updateable nameplate sign with Snap-in-place lens fixture (patent pending) or Bolt-in-place lens fixture.

## How It Works - Components

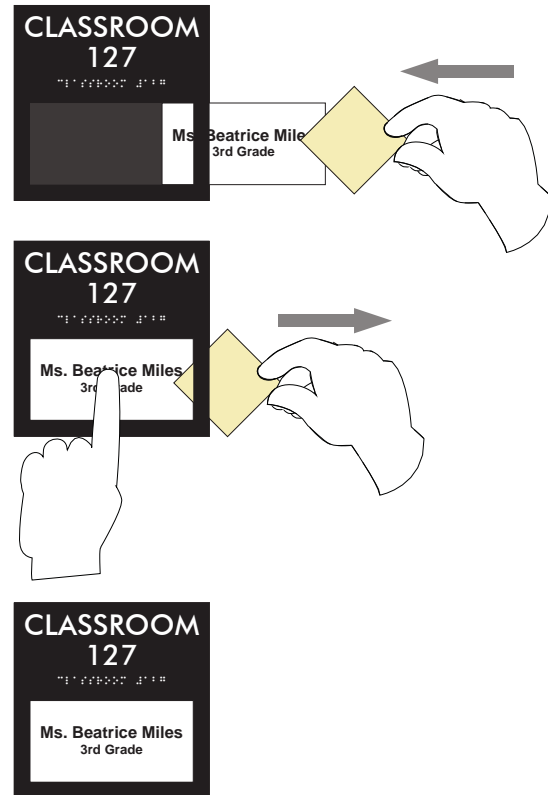

### B6x6-Synergy

End-user updateable room sign with window for paper insert.

#### To install a new paper insert:

Attach a "sticky note" to the right side of the insert as shown. Slide the paper insert into the slot on the right-hand side of the Synergy Sign.

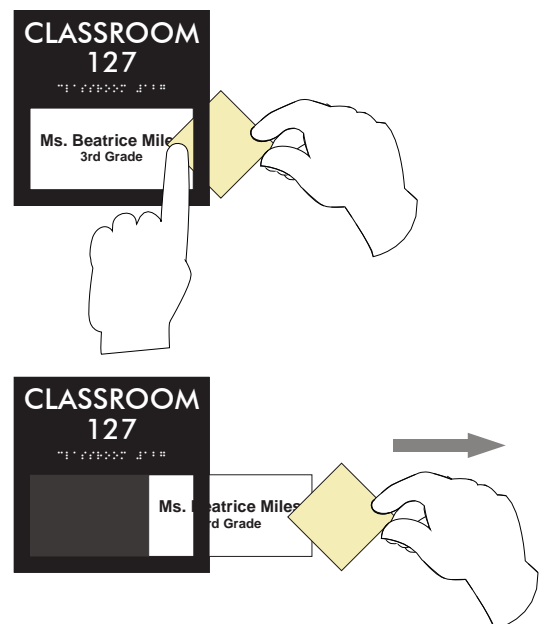

Once the insert is all the way in, press down on the middle of the window and pull the "sticky note" back to the right.

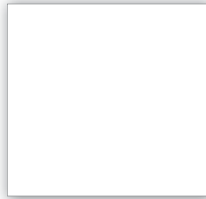

#### To remove a paper insert:

Insert a "sticky note" between the window and the paper insert. Press down on top of the "sticky note" inside the border of the window.

Once the "sticky note" adheres to the paper insert, remove your finger and pull the "Sticky note" back to the right.
